

CSC 142 Programming Assignment #0

For 0 Points

Note: This is a sample assignment for you to practice submitting assignments using Canvas online assignments. This is NOT graded for any points.

Submit by on or before: see [Canvas Online Calendar](#)

As we discussed in our class, coding in Java can be broken down into three simple steps:

- type code in a Eclipse class file (source-code)
- compile code in Eclipse to make sure there are no syntactical errors
- run code to execute your program

After following the directions on how to create a Java project (CSC142Assignment0) in Eclipse, type this code into a class file (HelloCSC142):

```
public class HelloCSC142 {  
    public static void main(String[] args) {  
        System.out.println("Hello CSC142 Class!");  
    }  
}
```

Compile your code and make sure it compiles *without* any errors.

Run your program and observe that Eclipse console (output) windows displays:
Hello CSC142 Class!

Submit the following using our Canvas online as Assignment#0:

- HelloCSC142.java file
